## NOTES:

- Applications with specific Fire Resistance Level (FRL) and Fire Resistance Rate (FRR) requirements need to be consulted with KIP Technical Services. The attached are not the approved fire wall details.
- Core thickness dimensions are nominal, actual dimensions will vary due to manufacturing tolerances. Exact dimensions must always be measured from actual samples. All dimensions in millimetres.
- Where Kingspan elements interface with other products the designer should consider the vapour control layers, thermal bridging, continuous insulation, and any dissimilar materials either in contact with or where water can run from or to each other. Kingspan accepts no responsibility for the performance of products that are not manufactured or supplied by Kingspan.
- The number of fixings shown on any detail is an indication only, the actual number required is project specific and need to be calculated based on project specific conditions.
- All structural supports shown are 'not by Kingspan'. They are shown for clarification and illustrative purposes only.
- Cold rolled steel sections are typically shown on these details however hot rolled or timber can be substituted.
- The location of the vapour barrier and associated sealants in these details are for typical "ambient/benign environment" installations.
- The information provided is for information and illustrative purposes only and is intended to be used as an aid for projects intending to use Kingspan products. Kingspan cannot guarantee the accuracy of the information provided or that information that has been supplied by third parties is up to date and accurate. All information provided must be checked and approved by a suitably qualified person before it is relied upon and/or incorporated into any construction project. Kingspan accept no liability for any losses, damage and/or causes, whatsoever and of any nature, that may arise by relying upon any of the information provided, or by any omissions or errors that may occur. You bear sole responsibility for the accuracy of any information relied upon. Any and all information concern is solely for the use of Kingspan products.

## ALTERNATIVE FIXING METHOD

K-Roc™ Rockspan Wall Panel Horizontally laid

Min. 0.5mm coil coated steel flashing with  
150mm overlaps, sealed with two continuous  
runs of gun-grade sealant

Flashing fixed to max. 450mm centres, with  
continuous run of 6x4mm butyl sealant

Air seal gun-grade at panel joint in line with  
internal air seal

Continuous run of Kingspan 20x9mm PVC  
sealant tape (Code:RAS9X20)
