

CASCADE HANGING OPTIONS

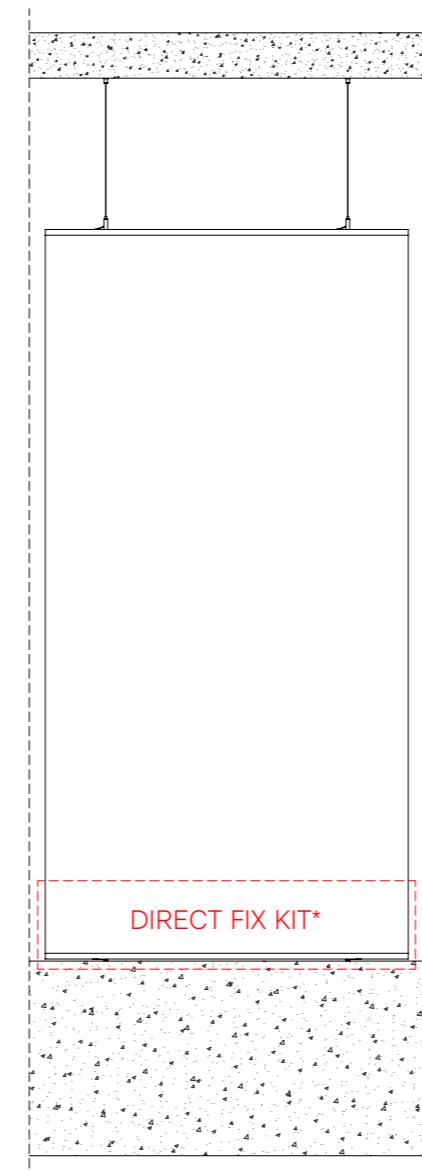

01. Suspended Top  
- Free Hanging Base

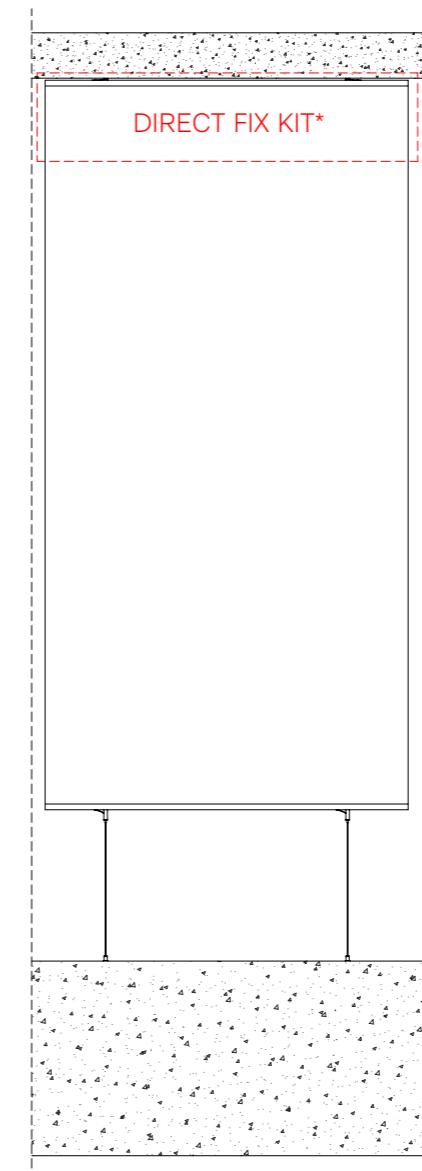

02. Suspended Top  
- Suspended Base

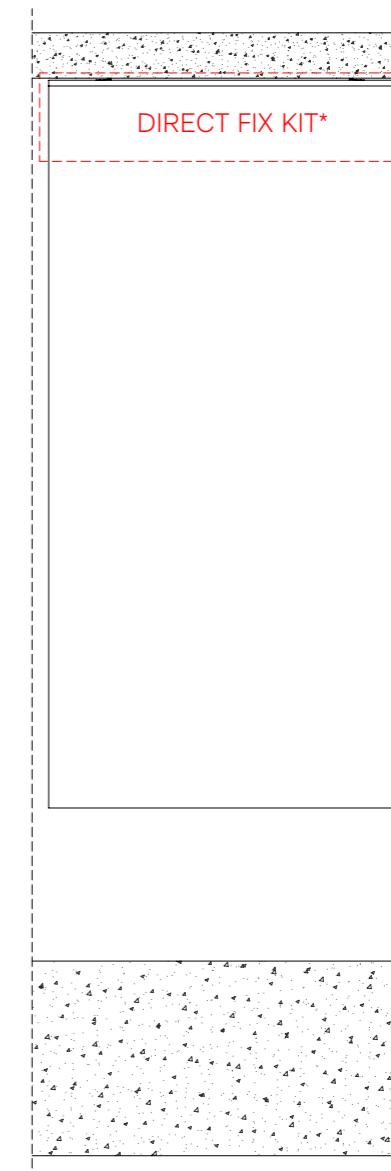

03. Suspended Top  
- Direct Fixed Base

04. Direct Fixed Top  
- Suspended Base

05. Direct Fixed Top  
- Free Hanging Base

\* This option requires additional components to the standard pack

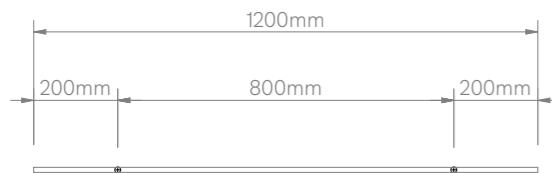

\* This option requires additional components to the standard pack

\* This option requires additional components to the standard pack

\* This option requires substitute components to the standard pack

Before work commences, please ensure you take the time to plan out your Cascade install, plan out your fixing points and the spacings of the screens.

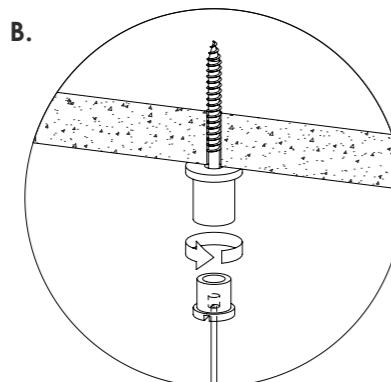

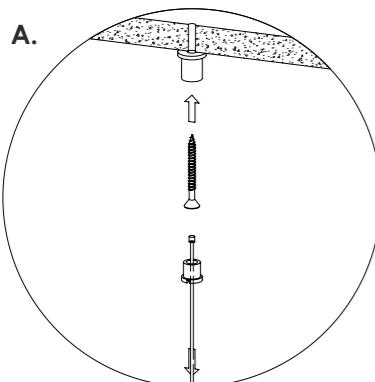

1. Mark out fixing points as shown for each screen.

2. A. Unscrew cap from the ceiling connector base and screw the base part to the ceiling as marked out in step 1. Thread the supplied cable through the cap so that the ball stop sits inside the cap.

B. Screw the cap back into the base.

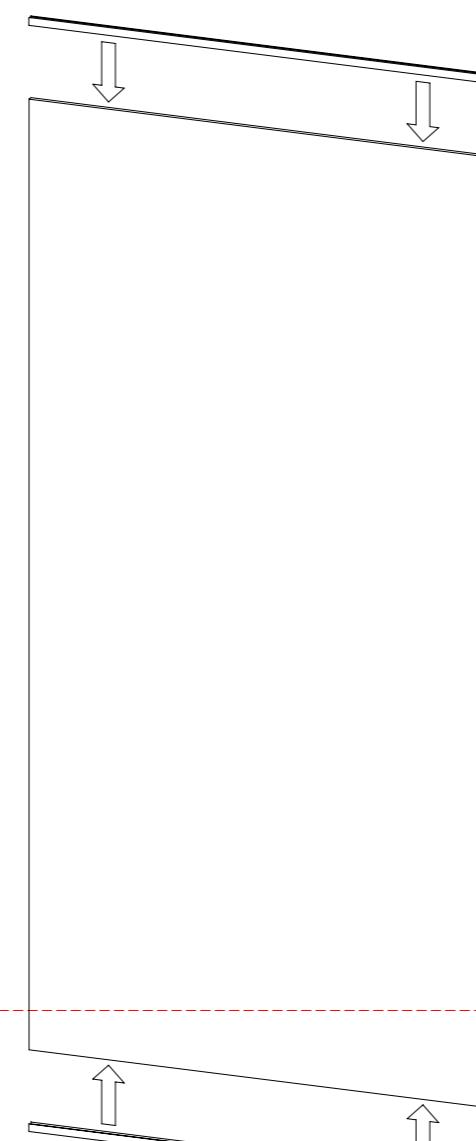

Repeat for the other suspension kit(s)

3. Press extrusion firmly onto the top of the screen, ensuring it is seated fully.

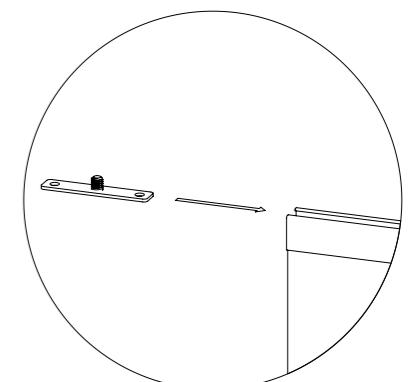

For extra grip, gently squeeze the channel that is holding the screen along its length.

If screen is to be fixed at the base, repeat as per the top with additional direct fix or suspension kit.

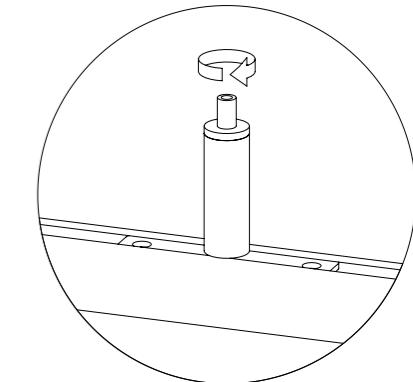

Fixing at both ends requires additional components to the standard pack

4. Slide connector plate into the top of the channel at both ends.

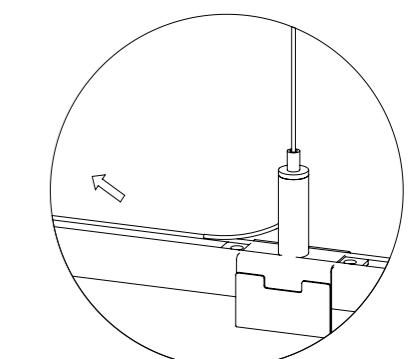

5. With the connector plate in the position indicated in step 1, screw the adjustment barrel into the threaded boss.

Hand tighten to lock in position.

6. Lift screen up and thread the loose end of the wire through each adjustment barrel as shown.

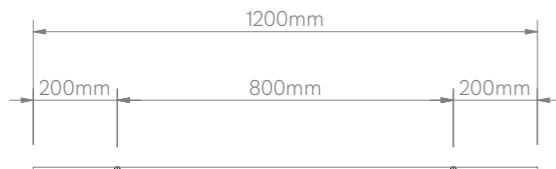

Pull on the loose end to tighten or press down on top of the barrel to loosen.

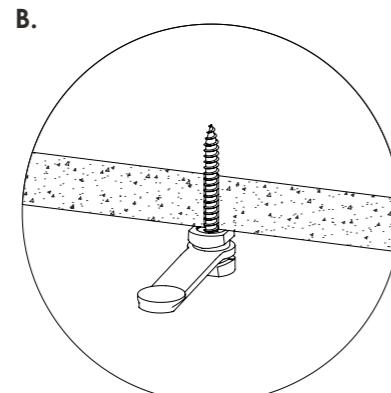

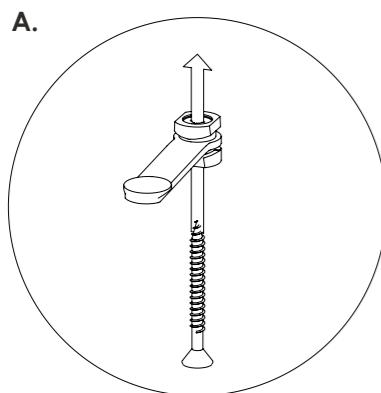

Before work commences, please ensure you take the time to plan out your Cascade install, plan out your fixing points and the spacings of the screens.

1. Mark out fixing points as shown for each screen.

2. A. Preset suitable 6-8g screw (not supplied) into Autex Mounting Clips x2 (RAFTCC)  
B. Screw into ceiling at marked fixing points

3. Press extrusion firmly onto the top of the screen, ensuring it is seated fully.

For extra grip, gently squeeze the channel that is holding the screen along its length.

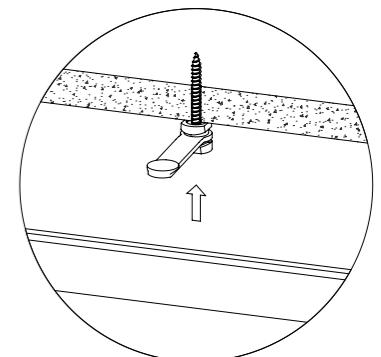

If the screen is to be fixed at the base, repeat as per the top with additional direct fix or suspension kit.

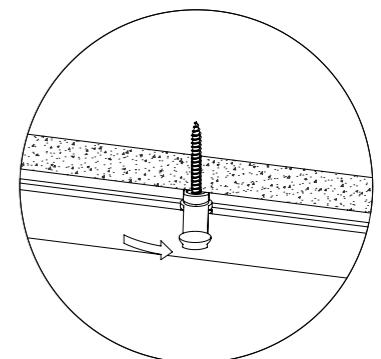

Fixing at both ends requires additional components to the standard pack

4. Offer up the screen to the installed Autex mounting clips.

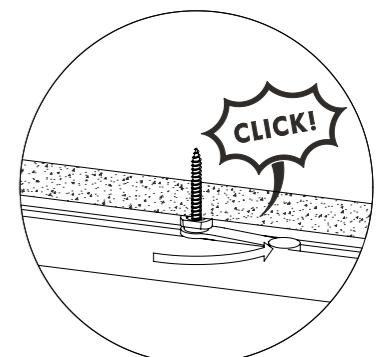

Make sure they are perpendicular to the screen and press channel onto the clips.

5. Twisting the mounting clip handle slightly will hold the screen in place while allowing fine adjustment of the screen left or right.

6. Twist the mounting clip until the handle clicks into the channel to lock the screen in position.
