

PAVING

CONCEPTS BY FIRTH

JAN 2025

WHY FIRTH PAVING?

1 PROUD HISTORY

We've been developing, making and delivering concrete products to New Zealanders since 1925.

2 INDUSTRY LEADING

Our technical team ensure you get top quality product that you can rely on.

3 CONSISTENT PRODUCT STRENGTH

Engineered and manufactured to ensure consistency of strength and durability.

4 HIGHEST RATING

All of our products are formulated to meet strict NZ standards.

5 KIWI MADE

Our pavers and retaining blocks are all made from locally sourced materials.

6 TRADE TRUSTED

So you can be sure what we make, makes the grade. Always.

7 SUSTAINABLE INNOVATION THAT ENDURES

Our engineers are committed to developing low-carbon, sustainable solutions that are built to last, contributing to a greener future.

MADE TO ORDER

If you can't find a colour or design mix that you're looking for, please contact your local stockist or Firth Sales Representative. For 'Made To Order' stock, minimum order quantities will apply.

A BEAUTIFULLY NATURAL PRODUCT

The appeal of concrete masonry is the natural characteristics and variation of aggregates featured within the mix. Similar to the features of real stone, our concrete products will have natural variation in colours and characteristics. So when choosing Firth concrete paving, please expect colour hue variations and regional differences due to locally sourced materials. It's all part of a beautifully natural product.

We strongly advise viewing our products before making your final decision. Contact your local merchant, they'll be happy to help.

choice for modern living.

Holland^{*} - Black Sands & Volcanic Ash

HONED FINISH

A stylish honed paving range that allows you to achieve a premium finish, and is complementary in size and colour, offering you more flexibility & creativity.

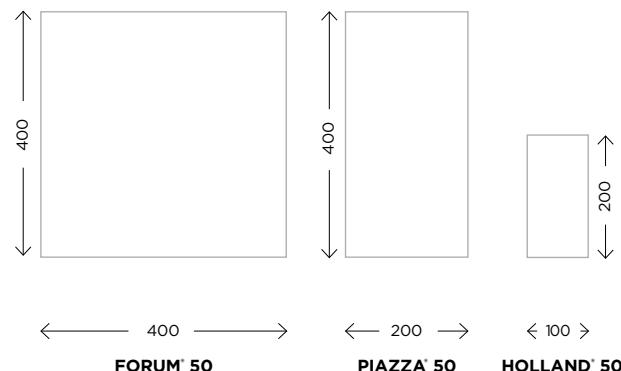

FAIR FACED FINISH

Firth fair faced pavers come in a variety of classic and contemporary colours to create unique living spaces that truly reflect your taste & style.

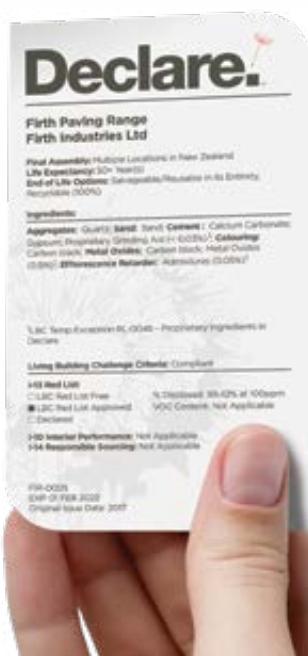

INTERCHANGEABLE SIZING

Applies to Forum® 50, Piazza® 50 & Holland® 50 only. Look for the .
Forum® dimensions are twice the size of the Piazza®. This offers the ability to incorporate a large format and medium format paver in your design. Pair Holland® with Forum® or Piazza® pavers to create interest with striking patterns.

SEALING

We recommend sealing pavers with a water based acrylic sealant. As well as increasing long term durability and colour retention, sealing reduces maintenance required for stains and cleaning. Honed pavers must be sealed once laid. All pavers are delivered unsealed.

DECLARACIÓN

We are proud to be the 1st concrete manufacturer in the world to get Declare labels for our ready-mix concrete and our concrete masonry products. Declare is an ingredients initiative for building products that is designed to shape a greener, healthier environment.

ENVIRONMENTAL PRODUCT DECLARATIONS

Firth holds Environmental Product Declarations for a range of our products. Please refer to our website for full details.

FORUM® 50

These stunning and durable large-format pavers can elevate any outdoor space with their visual charm and design flexibility. Compatible with Firth's Piazza® 50 and Holland® 50 pavers, they allow you to seamlessly mix large, medium, and small formats, giving you the freedom to create unique and personalized designs.

PERMEABLE PAVING

Firth EcoPave Permeable
Paving Range will assist in the
management of rain & storm
water runoff.

HOLLAND® FLOWPAVE

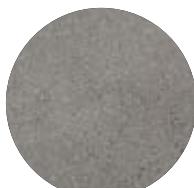

Holland® FlowPave has enlarged nibs on all four sides which creates wider than usual gaps around each paver. This space allows water to filter through to the underlying drainage medium. Easy to maintain, simply sweep the surface of the paver as required.

Note: Must be laid by accredited paviours.

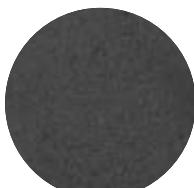

50 units per m²

Permeability Rate: 18,000mm/hr

GRASS PAVER

Firth Grass Pavers combine the natural and welcoming look of a grass lawn with the strength and durability of a paved surface. Grass pavers have widely spaced openings allowing grass to grow through. The permeability of the Grass Paver is subject to top soil and type of grass.

6.25 units per m²

Permeability Rate: Subject to conditions

Grass Paver - Natural

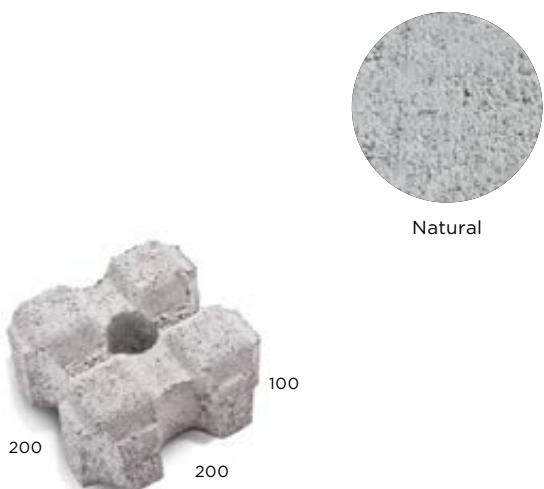

GOBI® BLOCK

Firth Gobi® Block is a heavy-duty paver for high-traction requirements. It's ideal for places where you want to retain a semi-grassed look; the design allows grass to grow through, plus water and nutrients to root systems below. The permeability of Gobi® Block is subject to top soil and type of grass.

25 units per m²

Permeability Rate: Subject to conditions

Gobi® Block - Natural

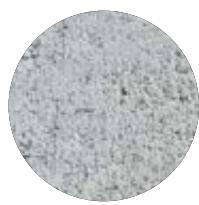

PIXEL PAVER

With growing urbanisation there is an increase in hard paved areas, building and other impervious structures. These structures disrupt the natural flow of stormwater runoff and create heat sinks that need to be managed. The Pixel Paver system provides a visually flexible and attractive solution to increasing the permeability of urban areas.

Note: Must be laid by accredited pavers.
The Pixel Paver is part of a system that works with Firth's Commercial Paving Range.

12.5 units per m²

Please keep in mind when you are choosing Firth paving products, you are dealing with a natural material that can be influenced by a number of factors. While every care has been taken to obtain an accurate representation, the aggregates and oxides used to create these products are natural products and as a result some variations will occur. Variations between North and South Island manufactured products will occur due to locally sourced materials.

For information on masonry product care and building product warranties, please visit our website, www.firth.co.nz.
